Forensic DNA Technical Leader Approval

Issue Date

11/28/2022

Position Summary-Senior Forensic DNA Analyst

1. Purpose

To describe the roles and responsibilities of the position of Senior Forensic DNA Analyst within the organization and provide the minimum education, experience, certification, knowledge, skills and abilities required for the position.

2. Summary

The Senior Forensic DNA Analyst position acts as a Forensic DNA Analyst in all functions. This role is expected to be filled by a staff member with experience and insight into the technical aspects and operational processing of a Forensic DNA Analyst, thus team members with this position are expected to act as mentors and resources for less experienced staff in day-to-day activities, projects and training.

3. Procedure

Minimum Educational Requirements

1. Bachelor's degree in a natural, physical, or forensic science area
2. Successful completion of twelve semester (or equivalent) credit hours from a combination of the following subject areas:
 - a. Biochemistry
 - b. Genetics
 - c. Molecular Biology
 - d. Statistics and/or Population Genetics
3. Coursework with titles other than the above listed subject areas may be substituted provided it can be demonstrated to be compliant with the FBI's Quality Assurance Standards
 - a. Compliance and documentation may be demonstrated with pertinent materials such as:
 - i. Transcripts
 - ii. Syllabus
 - iii. Letter from the instructor
 - iv. Other relevant documentation that supports course content

Minimum Experience Requirements

1. Three years of Forensic DNA laboratory experience
 - a. Obtained at a laboratory where DNA testing was conducted for the identification and evaluation of biological evidence in criminal matters
 - b. Obtained as a **qualified** DNA analyst on human DNA testing on forensic samples

Preferred Certification

1. American Board of Criminalists (ABC) certification in an applicable field (or equivalent)
 - a. Applicable fields include Biological Evidence Screening (ABC-BIO), Forensic DNA (ABC-DNA), and Molecular Biology (ABC-MB)

Forensic DNA Technical Leader Approval

Issue Date

11/28/2022

Mandatory Roles and Responsibilities

1. Perform scientific examination, all laboratory functions and DNA analysis of biological evidence collected in connection with death and criminal investigations, including comparison and interpretation of STR DNA profiles as well as statistical analysis as applicable
 - i. DNA interpretation and analysis (STR, SNP, NGS, mtDNA) required as needed
 - ii. Non-criminal casework (private DNA testing, research, genealogy studies etc.) may be required as needed
2. Crafting and authorizing a laboratory report as a result of testing, interpretation and analysis
3. Provide Forensic DNA technical and/or administrative peer review
4. Testify as an expert witness in court proceedings
5. Participate in continuing education (workshops, training courses, conferences etc.) as per laboratory policy and applicable accreditation, certification and FBIQAS requirements
 - a. Maintain documentation of above participation as per policy
6. Participate in the IMF proficiency testing program
7. Maintain at least a minimum level of productivity as determined by relevant management staff
8. Adhere to all safety procedures and protocols as mandated by the laboratory management system

Additional Roles and Responsibilities

1. Assist in hiring process of Forensic DNA Analyst (and other positions as needed by relevant management staff)
2. Provide technical training and mentorship of Forensic DNA Analyst and Forensic Molecular Biologist staff
3. Assist and/or manage projects and validations as needed by relevant management staff or Forensic DNA Technical Leader.
